11:30 – 12:30 p.m.  Plenary 1: Corporate Sustainability 2.0: Beyond the Business Case

A series of recent papers in the Stanford Social Innovation Review by active ARCS participants and practitioners have raised fundamental questions about the usefulness of corporate sustainability at this point in time. A substantial part of the critique is that corporate sustainability by necessity relies on win/win strategies, since companies are not willing to sacrifice profits. Yet many of our thorniest social and environmental problems may actually require tradeoffs, and a focus on “the business case” may distract from the collective action needed to solve them.

Speakers:
• Auden Schendler, VP Sustainability, Aspen Skiing – The Complicity of Corporate Sustainability
• Ken Pucker, former COO, Timberland – The Dangerous Allure of Win/Win Strategies

Moderator: Tima Bansal, Western University
Academic Discussant: Magali Delmas, University of California, Los Angeles

**Plenary 2: ESG and Sustainable Finance**
Interest in ESG investing is exploding. The ARCS academic keynote at MIT was delivered by George Serafeim from HBS, who argues that materiality-weighted ESG investments outperform other investments. However, Andy King argued in a recent ARCS seminar that this is not a robust result. Tim Mohin and Bob Eccles argue that it is crucial to create a global sustainability standards board for accounting. Bob wrote a blog for ARCS on this topic recently.
But is this just another version of the “Business Case for CSR”? Tariq Fancy, former head of sustainable investing for Blackrock, has been writing about the limitations of ESG investing. And although investors love ESG, does it actually make any difference? On this question we have much less research to lean on. Is ESG investing just a way to make investors feel less guilty?

Speakers:
- Tariq Fancy, former Chief Investment Officer of Sustainable Investing, Blackrock
- Cheryl Smith, Managing Partner, Economist and Portfolio Manager, Trillium

Moderator: Andrew King, Boston University  
Academic Discussant: Hao Liang - Singapore Management University, ARCS Emerging Scholar 2020
